KUSH AJITKUMAR CHAUDHARI

+1 (514) 592-9960 | chaudharikush4261@gmail.com | linkedin.com/in/kush-ajitkumar-chaudhari/

SUMMARY OF SKILLS AND QUALIFICATIONS

Operating Systems: Windows 11, Linux, Mac, Mobile
Programming: C, C++, Python, java, SQL, HTML/CSS, JavaScript, TypeScript
Frameworks: Node.js, React.js, Angular, ReactJS, Express.js, NestJS, TailwindCSS
Tools: Git, MongoDB, Couchbase, Elasticsearch, MySQL, PostgreSQL
Libraries: PyTorch, TensorFlow, Sklearn, NumPy, Pandas, Matplotlib
Languages: English – Advanced Level, Hindi – Advanced Level, Gujarati – Mother Tongue

EDUCATION

Concordia University — Montreal, QC, Canada **September 2026 - Present**
Master of Applied Computer Science (MACS)
Coursework: Object-Oriented Programming – java, Introduction to Theoretical Computer Science, Programming and Problem Solving - java, Advanced Programming Practices - java

Gujarat Technological University, Ahmedabad, Gujarat, India **October 2021 – June 2025**
Bachelor of Engineering: Computer Science and Engineering (AI & ML) CGPA: 8.65/10
Coursework: Software Engineering, Machine Learning, Deep Learning, Database Management Systems, Operating Systems, Object-Oriented Programming, Data Structures and Algorithms, Natural Language Processing, Big Data Analysis, Probability and Statistics.

EXPERINCE

Anand Medical Store, Gandhinagar, Gujarat, India **July 2025 – June 2026**
Data Analyst

- Collected and documented requirements for pharmacy operations, including inventory management, sales tracking, and customer records, to support efficient day-to-day functioning and data-driven decision-making.
- Designed, developed, and maintained database systems and data models to manage medicine inventory, supplier details, and sales data; implemented and tested solutions to ensure accuracy, reliability, and smooth integration with pharmacy processes.
- Operated database systems to analyse sales and inventory data, performed data mining to identify demand patterns, and provided recommendations on database tools and practices to improve stock control, procurement planning, and overall efficiency; also supported coordination of staff when required.

BRISKGAINS Pvt. Ltd., Ahmedabad, Gujarat, India **July 2024 – June 2025**
Machine Learning Intern

- Developed a custom dataset and utilised Python libraries like Mediapipe, YOLO, and transfer learning for extracting faces and lip movements in the Visual Speech Recognition for Gujarati Language project, contributing to the creation of a speech recognition system for the deaf and improving data extraction efficiency by 20%.
- Applied deep learning techniques to analyse lip movements and accurately convert them into text, optimising image pre-processing and feature extraction, leading to a 25% increase in recognition accuracy for the Gujarati language.
- Gained hands-on experience in dataset management, transfer learning, and algorithm optimisation, contributing to developing a personalised speech recognition solution for the deaf in Gujarati, achieving 95% data processing efficiency.

PROJECTS

Image Super-Resolution **October 2024- November 2024**

- Developed and evaluated EDSR and RCAN models using TensorFlow/Keras, achieving an average PSNR of 33.2 dB and SSIM of 0.92, demonstrating 96.5% accuracy in fine detail preservation for image reconstruction, highlighting analytical thinking and technical expertise.
- Processed high-resolution datasets (DIV2K, Set5) with downsampling and normalisation, enhancing model training efficiency and illustrating research skills applicable to fields like medical imaging, satellite imagery, and photography.

Yoga Gesture Detection **March 2024- April 2024**

- Built an AI-powered yoga posture correction system using TensorFlow, MediaPipe, BlazePose, and OpenCV, achieving 96.2% accuracy in real-time pose classification and improving user alignment feedback, showcasing creative problem-solving and time management.
- Refined model performance with the Adam optimiser and categorical cross-entropy loss, boosting precision (95.8%) and recall (96.5%) while enhancing practical skills in real-time deployment and technical optimisation.

Hospital Management System **August 2023- November 2023**

- Spearheaded a team in developing a full-stack web application using React.js, Node.js, Express.js, and MongoDB to optimise appointment scheduling and patient records management, reducing patient wait times by 30% and improving accessibility, demonstrating leadership and project management.
- Executed secure authentication and streamlined database queries, decreasing login time by 40% and boosting system performance, while following Agile methodology and SDLC for process-driven development, exhibiting adaptability and problem-solving.

VOLUNTEER WORK / EXTRA-CURRICULAR ACTIVITIES

- **Rural Intern, Manav Kartavya:** Taught mathematics, science, and technology to underprivileged students, created interactive learning materials, and organised workshops, demonstrating strong leadership, communication, and organisational skills while making a positive impact on the community.
- **Core Member, Artificial Intelligence Club:** Mentored freshers on AI concepts such as CNN, LSTM, and Transfer Learning, led hands-on projects, and organised workshops, demonstrating leadership, teamwork, and strong communication skills in fostering a collaborative learning environment.
